1 - Import a Building in City Life

This tool allows you to import new buildings in City Life, therefore customizing your game.

Step 1: Download and Install Building Importer

Download the file called “CL_Building_Importer_Install.exe”
Once downloaded, click on it to install the Building Importer.

Step 2: Use Building Importer

Download new building files, or use a building file you made on your own.
If you are a registered user of City Life, you have or will receive soon 2 new buildings.
Place those .pkb files in the City Life\BIN directory

In the Start Menu, now go to Program/Monte Cristo/City Life/Building Importer

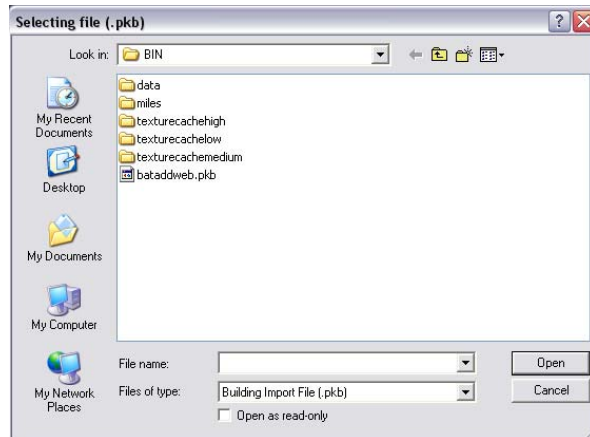

This window appears:

Click on the button marked with three dots “...”

There locate the .pkb building file you placed in the Life/BIN folder, select it and click on Open.

The Selecting file window closes, and you’re back Building Importer window.

City
to the

There, click “Import” button.

The operation is now complete and the new building is now integrated in City Life.
