

FaqMaker' s Configuration

FaqMaker is written in php 4 and under GNU-GPL licence.

I. Database création

FaqMaker works with MySql.

- a. Create a new database
- b. Execute dump called database.sql into phpMyAdmin or execute the request in your favorite terminal.

II. Fill variables

Open ./script/vars.php and fill variables as shown.

III.Configuration of .htaccess file

WARNING there are 2 .htaccess file. We are interested in the one which location is into ./extranet.

Open it and indicate full path to .htpasswd file (which is in the same directory).

Knowing the path is easy, you can do it in a php file, simply write this :

```
echo $_SERVER['DOCUMENT_ROOT' ;]
```

and pick up the result in your favorite web browser, if you don't know the path of course.

IV.Configuration of .htpasswd file

UNIX-like users will easily create users thanks to htpasswd program, like this :

In a terminal type :

```
# htpasswd /var/www/faqmaker/extranet/.htpasswd user_name
```

htpasswd invites to write a password for the user.

Repeat this for each user you create

Nevertheless, I invite you reading the doc typing:

```
# man htpasswd
```

in a terminal

The instruction above will work, but htpasswd has got many useful options

For windows user, in fact, I cannot guide you so www.google.com shall give you answers on the way to manage htpasswd under windows.

I apologize (do I ? ;)).

Even though you can write it by yourself in htpasswd, passwords won't be encrypted.

Moreover, windows does not understand file beginning by a ' .' like htpasswd.

V. Finish install

Place directory into your http directory. The end.

VI. Customize

To easily customize faqmaker, open affichage.css, instructions into comments will guide you.

VII. Support

Into Project in English on <http://www.dogma-tic.net>, a forum is open for you.

You can also write me:

loquace@dogma-tic.net

Enjoy

Read next to learn using faqmaker administration ;)

FaqMaker Administration Manual

I. Accessing extranet

http://faqmaker_root/extranet

Then identify yourself.

II. FAQ modification

Click « Gérer les FAQ ».

IMPORTANT : You can translate the menu into extranet/menu.php

There is not many many words so search them in the files

A form appears, fill it with a title and a content and click on « Ok » in « Validation » fieldset.

III. Modifying topics

Click on « Gérer la wikiPage ».

If no topic exists, a message will say about it.

1. Add a topic

To add a topic, click on : « Ajout de thème » (fig-1) in the top right corner button, then fill a title for your new topic. Click on « Ok »

Now you are back on the section ' s welcome page. To modify the title, click on the link called « Modifier », then do it and click on « Ok ».

2. Adding chapters

To add a chapter you have to enter into the topic. To do so, **click on the title** of the topic into which you want to create chapters.

A form appears :

The screenshot shows a web browser window with the URL `http://localhost/modulefaq/extranet/index.php?action=2&consultation=1`. The page is titled "Administration" and features a sidebar menu with links: "Accueil", "Gérer les FAQ", "Gérer la wikiPage", and "Retour au site".

The main content area includes a section titled "Add a chapter" with a button labeled "Ajout de chapitre". Below this is a list of existing chapters: "Introduction", "Chap1", "test sous titre", and "Chap2".

A form titled "Nouveau chapitre" is displayed with the following fields:

- Intitulé du chapitre :** A text input field with an annotation "Give a title".
- Rang du chapitre :** A text input field with an annotation "Give a number to define the rank for the chapter. This is the chapter's position in the list." This field is circled in red.
- Afficher comme sous titre? :** A checkbox with an annotation "For the chapter to appear as a subtitle, click here.".
- Contenu :** A large text area with an annotation "Type here a content for the chapter if needed.".

The bottom of the browser window shows a taskbar with various application icons and a system clock displaying "23:46".

To modify a chapter, click on the chapter's title in the list.

To DELETE a chapter, click on the chapter's title, at the bottom of the page a fieldset « Suppression » exists

To DELETE a topic, click on « Gérer la wikiPage », click on the title of the topic, a fieldset « Suppression » exists .
