

# Chapter 1:

## Build you library

### Adding images to your library

Before doing any photo mix, you need to add images to your library. You can use BMP, JPEG, GIF, PNG, TIFF format. For best results you should add a good number of images to your library. More images are present in the database, the longer the processing time. From menu select Library -> Add Images to library.

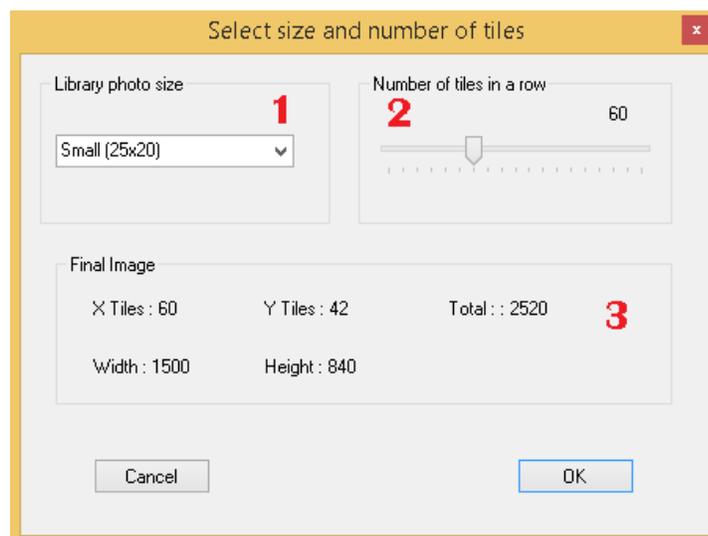

Select a folder (it looks also in sub-folders) with images. The process can take some time. You can see the counter advancing on the main screen. At the the end a popup will appear. Library images are stored in 4 sizes (Small : 25x20, Medium : 50x40, Large : 100x80, XLarge 150x120).

# Chapter 2: Action!

## Select Image, final size

It's time to do your photo collage. From menu select "Create Mix" -> "Select Image and go". Select the image that you want to process. After that a new popup will appear :

You have to choose the size of the photo library (1) as seen in chapter 1. Later, you have to choose the number of tiles in a row (2). More tiles mean a better result, but a longer processing time.

You can view the final size of the image in the box 3. After pressing "OK" it opens the dialog box to choose the name of the final image.

You can see the counter advancing on the main screen.
