

You Can't Block This

Welcome!

First things first. I'd like to thank you for picking up this nifty software. I am sure you'll like it.

Second, I want to go over what your "rights" are to this software - which vary depending on what you bought. So let's get down to it...

"I just bought the software and nothing else" - This means that you get to use the software for yourself and that's it. You can't give it away, use it as a bonus, resell it directly, etc. Use Only. If you like the software and want to promote it to others, make sure you log in to the download area and grab your affiliate link. You get 50% of every sale AND upsell. You can see the potential... :)

"I grabbed the Rebrand/Master Resale Rights package" - Nice. Here's what you get to do with that. All of the above PLUS you get a rebranding tool that let's you rename the software, put in your own graphics, edit the About area and even allows you to edit the Help page. You ALSO are allowed to resell the resale rights to others. So you can sell the software for one price, and the resale rights as an upsell, and keep 100% of every penny you earn.

Limitation on the Rebrand/Master Resale Rights package: You can NOT sell them the Rebrand/Master Resale Rights. That means you must never include the rebranding tool when you sell the software. You must refer them back to the main site (with your affiliate link, of course).

Finally, this ReadMeFirst file must always be included in all sales. If you purchased rebrand rights, you can put your own images, name and website info, but that's it.

Thanks and enjoy!

Michael Ambrosio
